

WARREN MORRISON
UK LTD

MANUAL GEARBOX
GO SERIES

Warren-Morrison Valves

Established in 1949 in the United Kingdom, Warren-Morrison UK Ltd. has been manufacturing its own unique range of industrial valves and actuators for over 65 years. Benefiting from our own internal rubber mould department, machine shop and development and test facilities, we maintain total control over production and quality through continuous 'in process inspection'. Our dedication towards future development has continued to ensure our market position as a select industrial valve and accessories manufacturer and supplier.

Warren-Morrison Manual Gearbox Operator

The Warren Morrison GO Series Manual Gearbox is a handwheel operated actuator for quarter turn valves. The Series is designed to cover a wide range of torques comfortably covering low to high torque values. The cast/ductile iron body housing is not only strong and rugged but protects the internal parts allowing for extended and long term maintenance free operation. The bottom mounting pad is to suit ISO 5211 allowing the units to be fitted directly to equivalent ISO 5211 valve mounting pads.

Manual Gearbox Features:

- Rigid Cast/Ductile Iron body material with epoxy coating.
- Clear indicator with graduated scale to show the valve position.
- The Manual Gearbox has IP67 ingress protection level.
- Mounting compatibility to ISO 5211 International Standards.
- Grease nipples are included as standard to extend the service life of the Gearbox.
- Adjustable travel stops adjust the opening and closing to (+/- 5 degrees).
- Optional drive adaptor can be provided to match the customers valve shaft.
- Pad-locking plates are available as an option.
- Limit Switch can be supplied as an option.
- A chain-wheel drive can be supplied as an option.
- Variety of colours available as an option.
